Are Newer Movies DYING in Quality?

Analysis by Amir Demings

With great releases like Infinity War, one might believe that modern films have a steady repertoire that captivate and leave us teeming with emotion as we leave theatres.

But the reality is much more

Sinister...

Goal

Using the internet's largest database for movies (Imdb), we're going to find out if films have truly been getting better over the years.

➔ **Why**
   To open discussion about the Film Industry.

➔ **How**
   By relying on the relevant data.

➔ **What Will We Find?**
   Let's see…

Graphs of the Top 100
Most Popular Movies By Year

How many movies from each year were mentioned on list.

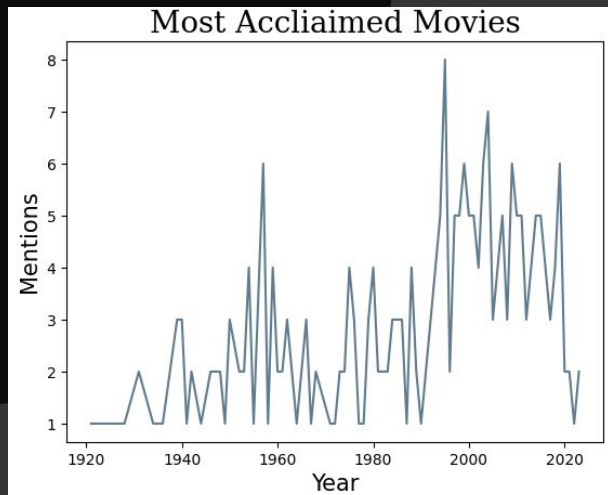

Older popular films average quite high.

Rating from movies of each year.

- **Note**

Over 70% of Movies on the Top 100 list are from the 21st Century!

Graphs of the Top 250
Best Rated Movies By Year

Most Acclaimed Movies

How many movies from each year were mentioned on list.

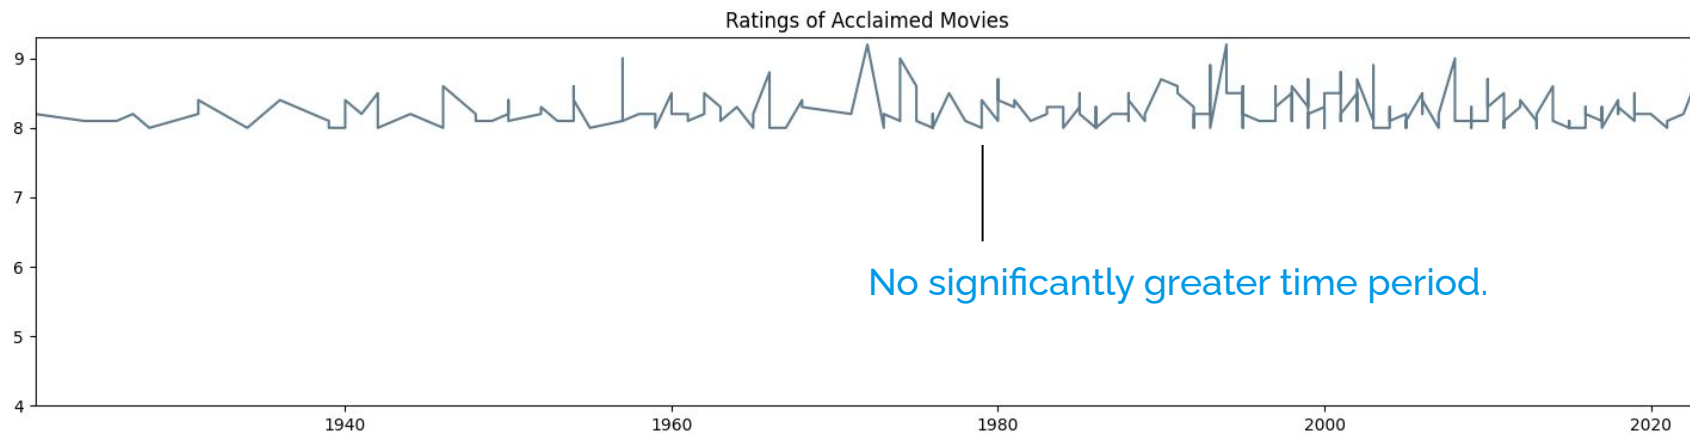

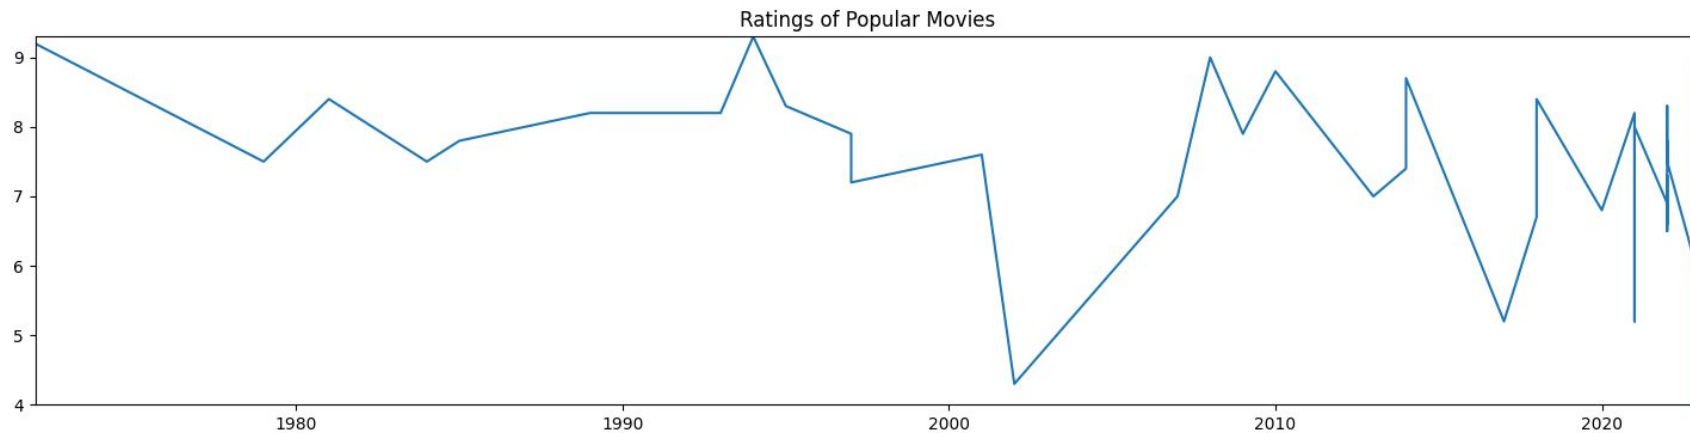

Most Acclaimed Movies

Rating from movies of each year.

- Note

Over 70% of Movies on the Top 100 list are from the 21st Century!

Comparison Of Ratings

Magnified for Observation**

Ratings of Popular Movies

Ratings of Acclaimed Movies

No significantly greater time period.

By observing the rates and distribution of popular movies over time, a trend **could not** be found.

PERHAPS

This may be a testament to the timelessness of genuinely good movies, as well as a shining light for the future of film.

Some Things That Are For Sure

❖ Due to increased marketing, new releases dominate popularity charts.

❖ Advances in production mean more movies over time (good and bad).

❖ Popularity does not mean quality.

❖ Quality films stand the test of time.

Thank You For Your Time
